16kg in weight

\$1650

Sunpak Stainless Steel Infrared Heater

34mj/hr
Coverage: 4m x 4m area
Wind and rain resistant
Commercial quality
1213mm x 203mm x 203mm
0 to 30 degree mounting option

Gasmate EH305 Electric Heater

- Comes with stand or wall fittings
- Black powder coated finish
- Height:: 2100mm (on stand)
- Width & Depth: 650mm
- Max. Output: 2000 Watts
- Consumption (approx.): 2 kW/h

\$385

Heatstrip

- Radiant Heat = Gentle, Comfortable Heat
- IPX-5 Water Protection Rating -Specifically engineered for undercover, outdoor applications, the HEATSTRIP is waterproof to the point where you could actually use a hose on them.
- Subtle, Unobtrusive - The slim line, black panels of the HEATSTRIP do not emit light or glow when in use.
- Ceiling or wall mounting
- Silent Operation
- The outer casing of the HEATSTRIP are made from tough, durable Steel- Standard models feature a silver matte powder coated steel casing; SS models feature a polished stainless steel casing.
- The ceiling / wall mounting brackets that accompany the HEATSTRIP are made from tough, durable Stainless Steel.
- Australian Made and Owned Quality Product

DIMENSIONS

Standard Models – Silver powder coated casing

Model	Watts	Amps	Dimensions	Weight	Price (inc GST)
THH 1200	1200	5.0(5.2)	680 x 172 x 45	4.5kg	\$600
THH 1500	1500	6.3(6.5)	850 x 172 x 45	5.0kg	\$640
THH 1800	1800	7.5(7.8)	1010 x 172 x 45	7.0kg	\$690
THH 2400	2400	10.0(10.4)	1330 x 172 x 45	9.0kg	\$790
THH 3200	3200	13.3(13.9)	1770 x 172 x 45	12.2kg	\$850

SS Models – Stainless Steel casing

Model	Watts	Amps	Dimensions	Weight	Price (inc GST)
THH 1200	1200	5.0(5.2)	750 x 165 x 45	5kg	\$650
THH 1500	1500	6.3(6.5)	850 x 172 x 45	5.5kg	\$700
THH 1800	1800	7.5(7.8)	1010 x 172 x 45	7.5kg	\$740
THH 2400	2400	10.0(10.4)	1330 x 172 x 45	9.0kg	\$860
THH 3200	3200	13.3(13.9)	1770 x 172 x 45	12.5kg	\$930

FREQUENTLY ASKED QUESTIONS

1. Is the HEATSTRIP easy to install and operate?

To attain the best possible performance in a part open, outdoor undercover application, the HEATSTRIP is ideally ceiling mounted directly above the area to be heated, at a mounting height between 2.3m to 3.0m from the floor. **Minimum mounting height is 2.1m.**

Each HEATSTRIP is supplied with Stainless Steel ceiling / wall mounting brackets, power cord, and user friendly installation and operation instructions. Models THH1200, THH1500, THH1800 and THH2400 are supplied with a power cord fitted with plug. Model THH3200 is supplied with a power cord without plug, and will require installation assistance by a licensed electrician.

2. Does the HEATSTRIP have options for control and operation?

There is no inbuilt temperature controller, and no on/off switch on the unit itself. These heaters may be plugged into a power outlet, or used in conjunction with a controller device to regulate on and off times.
